FERTILONE® 6.5.11

ORGANO-MINERAL NPK FERTILIZER 6-5-11.

FERTILONE® 6.5.11 is an organo-mineral NPK 6-5-11 fertilizer in pellet form, produced from composted animal manure obtained through an exclusive natural composting process. It provides stabilized, hygienized organic matter with outstanding agronomic value.

The combination of organic matter and mineral nutrients in **FERTILONE® 6.5.11** simplifies basal fertilization while providing a balanced and efficient nutritional base for proper crop establishment and development. In addition to supplying nutrients, it improves soil fertility and structure, enhances beneficial biological activity, and contributes to maintaining a more fertile and productive soil.

FERTILONE® 6.5.11 is supplied as uniform pellets, ensuring even distribution, excellent soil incorporation, and easy application with all types of fertilizer spreaders. Furthermore, the composting process guarantees a product free from pathogens and weed seeds, providing maximum safety together with a high-quality stabilized organic matter.

Progressive and efficient nutrition.

Composted organic matter promotes the gradual release of nutrients, improving their availability by the crop while providing a more balanced and sustained nutrient supply.

Greater soil productive capacity.

Stabilized organic matter improves the soil's capacity to retain water and nutrients, promoting higher fertility and long-term productivity..

Guaranteed composition (w/w):

6% Total Nitrogen (N).
- **2%** Organic Nitrogen (N) of animal origin from composted manure.
- **4%** Ammoniacal Nitrogen (N).

5% Total Phosphorus Pentoxide (P_2O_5).

11% Total Potassium Oxide (K_2O).

Other characteristics (w/w):

35-39% Total Organic Matter.

20-22% Organic carbon (C).

84-88% Dry matter.

Application rates and recommendations:

Cereals, Legumes and Field Crops.

Rainfed: Apply from 300 to 800 k/ha.
Apply as a basal fertilizer before sowing or transplanting.

Irrigated: Apply from 1000 to 3000 k/ha.
Apply as a basal fertilizer before sowing or transplanting.

Woody Crops.

Rainfed: Apply from 500 to 2000 k/ha.
Apply as a basal fertilizer during Autumn or Spring.

Irrigated: Apply from 600 to 3000 k/ha.
Apply as a basal fertilizer during Autumn or Spring..

Vegetable Crops.

Apply from 500 to 2000 k/ha.
Apply as a basal fertilizer before sowing or transplanting.

These application rates are intended as general guidelines and should be adjusted according to soil characteristics, crop requirements and growth stage. Please consult our technical department.

CE **FERTILONE® 6.5.11** is a CE-marked fertilizer, compliant with Regulation (EU) 2019/1009.
